## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-11, drawn to a transport tray having a circular receptacle, classified in class 385, subclass 135.
  - II. Claims 12-22, drawn to a transport tray having a lock, classified in class 385, subclass 134.
  - III. Claims 23-47, drawn to a transport tray having a retainer, classified in class 385, subclass 136.
  - IV. Claims 48-55, drawn to a transport tray having a registration feature in a receptacle, classified in class 385, subclass 137.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II-IV, II and II-IV, or III and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as receiving an electrical wire for the receptacle of the invention I and for the retainer of the inventions III and IV. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 2839

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
